Strasbourg, France

Position for a bioinformatician in Cancer Research Department of Cancer Biology

A position is open in the Department of Cancer Biology of the IGBMC for a bioinformatician to work on the analysis and integration of genome-wide biological data obtained by the different teams in the Department, to participate in the development of bioinformatics tools and to establish data analysis pipelines for Ultra-High-Throughput Sequencing data (ChIP Seq & RNA Seq).

Candidates must be highly motivated to work on biological questions and flexible to interact with the various groups of the Department. They should have a degree in computational biology, bioinformatics, statistics or equivalent level of knowledge and possess excellent programming skills (R, perl, python, etc). Operating language in the Institute is English. Applications including a cover letter, curriculum vitae and the names of two referees should be sent to: **Dr. Irene Yujnovsky** at **ireneyuj@igbmc.fr**

Information about the institute and the Department can be found at:
